

MEET HUBOT

Increasing Productivity & Having Fun

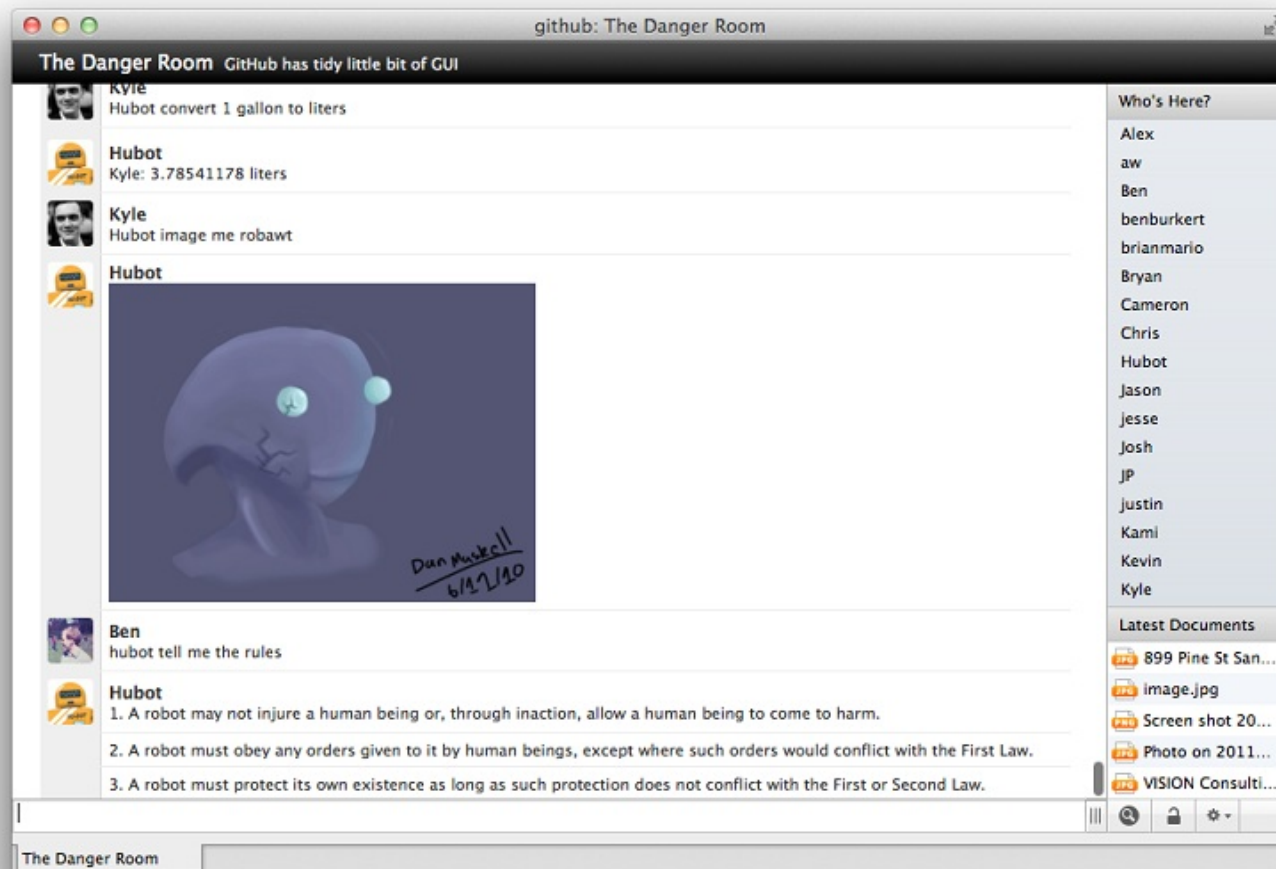

What is Hubot?

Chat robot for **Campfire**

Created by the folks at **GitHub**

Shared side project

NOW OPEN SOURCE

Why use Hubot?

Automating tasks

Having lots of fun

Everyone can contribute

Automating tasks

Hubot does the boring shit

Explaining tasks is easier

Run from anywhere

Deploying apps

Provisioning servers

Get the build status of any branch

Find out what's not deployed

Check pull requests and issues

Having some fun

Display random Google images

Office DJ via **PLAY**

Add a mustache to every image

ASCII me
Meme generator
Ship it squirrel
Pug me
Translate me

Has a HTTP API?

Add hacks to hubot

Has no HTTP API?

Wrap in a Sinatra app

Add hacks to hubot

Everyone contributes

Node.js and CoffeeScript

Let new hires add something

Always be adding cool stuff

How to use Hubot

Deploy to Heroku for **free**

Run locally with foreman/upstart

`bin/hubot -a campfire`

Hubot scripts

<http://git.io/hubot-scripts>

Fork and add your script

Send a pull request

Where to get Hubot

<http://git.io/hubot>

`npm install hubot`

Hubot Factory

Questions?

Speak to me after

THANKS!
